**NO.1 VERTICAL FORM-FILL-SEAL MACHINE TWIN 2000**

(With dosing system VIBROCELL)

Suitable to pack automatically *short dry pasta*, starting from a flat foil reel. The machine can automatically pull the film, form a pillow bag, make vertical and horizontal sealings, and cut the bag. Programmed circulation of refrigerating liquid in the sealing units by means of a pump, which allows good quality seals with any type of plastic material.

- Electric supply: Rev / 50 Hz / single-phase
- Completed with a forming tube of diameter 100 mm.
- Reel width: 390 mm (flat foil reel)
- Bag width: 165 mm
- Bag length: 50/280 mm
- Output: 8/10 bags/minute (500 or.)
- Film used: polyethylene
- polyethylene cc-extruded
- micro-perforated polypropylene
- laminated nylon-polyethylene

**Long pasta must be weighed and put BY HAND in the forming tube of the machine.**
